AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application.

Listing of Claims:

1.   (Currently Amended) A method comprising: for

arranging a conference call between three or more participants using a mobile terminal operating in a ~~cellular~~ wireless network in which method a group of participants of the conference call is formed~~, characterized in that in the~~ wherein the mobile terminal of the convener of the conference call performs

- drawing up a summons to a meeting ~~is drawn up~~ in a standardized form,

- sending a the summons to a the meeting ~~is sent~~ from a the mobile terminal to all ~~the~~ members of the group of participants, and

- receiving calls coming from the participants ~~are received~~ in the mobile terminal and ~~joined~~ joining them to the conference call automatically.

2.   (Currently Amended) A method according to Claim 1, ~~characterized in that~~ where the summons to the meeting is ~~formed~~ drawn up before the group of participants is formed.

3.   (Currently Amended) A method according to Claim 1, ~~characterized in that~~ where the group of participants is formed by selecting the participants from a list saved in ~~the~~ a memory of the mobile terminal and/or by manually inputting the contact information of the participants~~,~~; ~~such as~~ the contact information comprising at least one of telephone numbers, e-mail addresses ~~or SIP~~ ,and Session Initiation Protocol addresses ~~to the application manually~~.

4.   (Currently Amended) A method according to claim 1, ~~characterized in that~~ where the group of participants is given a name and ~~that~~ the formed group is saved in ~~the~~ a memory of the mobile terminal for later use.

5.   (Currently Amended) A method according to claim 1, ~~characterized in that the~~ where a

3

time of the conference call and other information concerning the conference call is given in the summons to the meeting.

6. (Currently Amended) A method according to Claim 5, ~~characterized in that the~~ where an agenda of the conference call is given in the summons to the meeting.

7. (Currently Amended) A method according to any one of claim 1, ~~characterized in that~~ where the summons to the meeting is formed as a character string composed of ~~ASCII~~ American Standard Code for Information Interchange characters.

8. (Currently Amended) A method according to Claim 7, ~~characterized in that~~ where the summons to the meeting is sent to the participants as a text message.

9. (Currently Amended) A method according to Claim 7, ~~characterized in that~~ where the summons to the meeting is sent to the participants as an e-mail message.

10. (Currently Amended) A method according to any one of claims 1, ~~characterized in that~~ where, in connection with ~~forming~~ drawing up the summons to the meeting, a connection is opened to a calendar application in the mobile terminal and a reservation of time is made in the calendar application.

11. (Currently Amended) A method according to any one of claims 1, ~~characterized in that~~ where the summons to the meeting is saved in ~~the~~ a memory of the mobile terminal for later use.

12. (Currently Amended) A method according to any one of claims 2, ~~characterized in that~~ ~~the~~ where a duration of the conference call and ~~the~~ a name of the group of participants are saved in ~~the~~ a memory of the mobile terminal.

13. (Currently Amended) A method according to any one of claims 1, ~~characterized in that~~ where the convener of the conference call is given a notification by means of the mobile

4

terminal when a new participant has been joined to the conference call.

14.   (Currently Amended) A method according to Claim 13, ~~characterized in that said~~ where the notification ~~is given with~~ comprises an acoustic signal or a recorded voice message.

15.   (Currently Amended) A memory storing an ~~An~~ application ~~in~~ for a mobile terminal of a ~~cellular~~ wireless network ~~for establishing~~ to establish a conference call between three or more participants ~~comprising means for forming~~ that form a group of participants of the conference call by actions comprising, ~~characterized in that said application further comprises~~
- ~~means for starting the application,~~
- ~~means for~~ drawing up a summons to a meeting in standardized form,
- ~~means for sending a~~ sending the summons to ~~a~~ the meeting to ~~the~~ members of the group of participants, and
- ~~means for receiving~~ receiving the calls coming from the participants and joining them to the conference call automatically.

16.   (Currently Amended) ~~An application~~ The memory according to Claim 15, ~~characterized in that~~ ~~said means for~~ where the actions comprise forming ~~a~~ the group of participants of the conference call ~~comprise means for~~ by selecting participants from a list saved in the memory of the mobile terminal ~~, and/or means for inputting the contact information of the participants, such as telephone numbers, e-mail addresses or SIP addresses to the application manually~~.

17.   (Currently Amended) ~~An application~~ The memory according to Claim 15, ~~characterized in that said~~ ~~means for~~ wherein the actions further comprise starting the application ~~comprise~~ using a starting icon produced on ~~the~~ a display of the mobile terminal.

18.   (Currently Amended) ~~An application~~ The memory according to Claim 15, ~~characterized~~ ~~in that said means for starting~~ wherein the actions further comprise starting the application ~~have~~ ~~been arranged in~~ from a menu of the mobile terminal.

5

19.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that said~~ where the summons to the meeting ~~has been~~ is formed as a character string composed of ~~ASCII~~ American Standard Code for Information Interchange characters.

20.   (Currently Amended) ~~An application~~ The memory according to Claim 19, ~~characterized in that said~~ where the summons to the meeting ~~has been~~ is formed as a text message.

21.   (Currently Amended) ~~An application~~ The memory according to Claim 19, ~~characterized in that said~~ where the summons to the meeting ~~has been~~ is formed as an e-mail message.

22.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that it also comprises means for~~ the actions further comprising creating a connection to a calendar application in the mobile terminal for making a reservation of time in the calendar application.

23.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that it also comprises means for~~ the actions further comprising separating the received summons to the meeting from other messages that have arrived.

24.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that it also comprises means for~~ the action further comprises picking up a telephone number from the received summons to the meeting and ~~for automatically making~~ to automatically make a call to the number picked up.

25.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that it also comprises means for~~ the actions further comprising saving ~~the~~ a duration of the conference call and ~~the~~ a name of the conference call in the memory of the mobile terminal.

26.   (Currently Amended) ~~An application~~ The memory according to claim 15, ~~characterized in that it also comprises means for~~ the actions further comprising giving a notification to the convener of the conference call when a new participant has been joined to the conference call.

27.   (Currently Amended) A mobile terminal ~~operating in a cellular network, with~~ comprising a display and memory and ~~means for~~ configured to ~~arranging~~ arrange a wireless conference call between three or more participants ~~comprising means for forming~~ that form a group of participants of the conference call, ~~characterized in that said means for arranging a conference call comprise~~ further comprising an application loaded into the memory of the mobile terminal, which ~~application includes~~ causes the mobile terminal to
- ~~means for starting the application,~~
- ~~means for drawing~~ draw up a summons to a meeting in standardized form,
- ~~means for sending a~~ send the summons to ~~a~~ the meeting to ~~the~~ members of the group of participants, and
- ~~means for receiving~~ receive calls coming from the participants and ~~joining~~ join them to the conference call automatically.

28.   (Currently Amended) A mobile terminal according to Claim 27, ~~characterized in that said means for starting~~ further configured to start the application ~~comprise~~ using a starting icon brought to the display of the mobile terminal.

29.   (Currently Amended) A mobile terminal according to Claim 27, ~~characterized in that said~~ ~~means for starting~~ further configured to start the application ~~have been arranged in~~ from a menu of the mobile terminal.

30.   (Currently Amended) A ~~computer program on a~~ storage ~~or data transfer~~ medium storing a computer program for loading an application into a memory of a mobile terminal, the application for establishing a conference call between three or more participants comprising means for forming a group of participants of the conference call, said application further comprising,
means for starting the application,
means for drawing up a summons to a meeting in a standardized form,
means for sending a summons to a meeting to members of the group of participants, and
means for receiving calls coming from the participants and joining them to the conference call

7

automatically,

where execution of the computer program results in operations that comprise,

in the mobile terminal of a convener of the conference call,

drawing up the summons to the meeting in standardized form,

sending the summons to the meeting from the mobile terminal to all members of the group of participants, and

in response to receiving a call from a participant, joining the participant to the conference call automatically.

31. (New) The memory according to Claim 15, where the actions comprise forming the group of participants of the conference call by inputting contact information of the participants to the application program manually, the contact information comprising at least one of telephone numbers, e-mail addresses, and Session Initiation Protocol addresses.
